

EU Declaration of Conformity to the Low Voltage Directive

Assmann Electronic Cabling Solutions hereby declares that all of its transmission technology products (patch panels, wall outlets, connectors, cables and cable assemblies) designed to be used for the creation of structured cabling systems meet the essential safety requirements of the Low Voltage Directive 72/23/EEC.

This declaration is based upon compliance with the EN 50173-1:2007 standard, which is the relevant harmonised EU standard as defined by directive for the following product:
