REACH

Evropska uredba 1907/2006 o registraciji, vrednotenju, odobritvi in omejevanju kemikalij (REACH) je začela veljati 1. junija 2007. Cilj REACH je zagotoviti zaščito zdravja ljudi in okolja pred tveganji, ki jih lahko predstavljajo kemikalije.

IC Intracom ne proizvaja kemikalij, pripravkov ali izdelkov, ki namerno sproščajo snovi v običajnih pogojih delovanja in zato ne sodijo v področje subjektov, ki se morajo predhodno registrirati in registrirati pri REACH.

Tako IC Intracom kot njeni ključni dobavitelji so zavezani izpolnjevanju naših zakonskih obveznosti v skladu z uredbo REACH in si prizadevajo ohraniti svojo vlogo v potrebnem komunikacijskem omrežju, potrebnem za podporo skladnosti z uredbo REACH.

Priloga XVII k uredbi REACH nalaga omejitve za nevarne snovi v pripravkih ali izdelkih, ki predstavljajo tveganje za zdravje ljudi ali okolje. Omejitev zajema širok spekter aplikacij. Potrjujemo, da naši izdelki izpolnjujejo pogoje omejitve, kot so opredeljeni v Prilogi XVII z naslovom »Omejitve proizvodnje, dajanja v promet in uporabe nekaterih nevarnih snovi, zmesi in izdelkov« z dne 26. junija 2009.

Od 25. junija 2020 je ECAH (Evropska agencija za kemikalije) uvrstila 209 snovi na seznam snovi, ki vzbujajo veliko skrb, za odobritev. Nobenega SVHC ni dovoljeno uporabljati, proizvajati ali uvažati brez predhodnega dovoljenja ECAH. Agencija ECHA bo „seznam kandidatov“ redno posodabljala in objavljala, saj bo več snovi opredeljenih kot SVHC.

Izdelki podjetja IC Intracom niso namerno izdelani ali pripravljeni s spojinami in snovmi nad 0,1% teže, navedenimi v dokumentu REACH z naslovom „Seznam snovi, ki zbuja veliko skrb za odobritev“ z dne 25. junija 2020.

Natančneje, izdelki, ki jih izdelujemo, so v celoti skladni s povezanimi zahtevami Uredbe Evropske unije (EU) 1907/2006, ki zadeva registracijo, vrednotenje, avtorizacijo in omejevanje kemikalij (REACH):

- Opis izdelkov: Z izjemo čistilnih izdelkov za elektroniko, skladnih z uredbo REACH, IC INTRACOM ne proizvaja snovi ali pripravkov snovi za uporabo v drugih izdelkih. Poleg tega ne predvidevamo sprememb, predhodne registracije ali avtorizacije za izdelke, ki jih dobavljamo.
- Člen 33 uredbe REACH - Dolžnost sporočanja informacij o snoveh v izdelkih: Izjavljamo, da naši izdelki ne vsebujejo niti omejenih snovi, določenih z direktivo REACH, niti količin ali koncentracije SVHC (snovi, ki zbuja veliko zaskrbljenost), enake ali višje od 0,1% v sestavi.

Določitev temelji na informacijah iz virov, za katere menimo, da so zanesljive.

REACH

The European Regulation 1907/2006 on Registration, Evaluation, Authorization, and restriction of Chemicals (REACH) entered into force on June 1, 2007. The goal of REACH is to ensure the protection of human health and the environment from the risks that can be posed by chemicals.

IC Intracom does not manufacture chemicals, preparations or articles that intentionally release substances under normal operating conditions and therefore do not fit within the scope of entities obligated to pre-register and register with REACH. Both IC Intracom and its key suppliers are committed to fulfill our legal obligations under REACH and seek to uphold our role in the necessary communication network needed to support REACH compliance.

Annex XVII of the REACH regulations imposes restrictions on hazardous substances in preparations or articles that present risks to human health or the environment. The restriction covers a wide range of applications. We certify that our products comply with the conditions of the restriction as defined in Annex XVII Titled "Restrictions on the manufacture, placing on the market and use of certain dangerous substances, mixtures and articles" dated June 26, 2009.

As of June 25, 2020, ECHA (The European Chemicals Agency) has placed 209 substances on the Candidate List of Substances of Very High Concern for authorization. Any SVHC must not be used, manufactured or imported without the prior authorization of the ECHA. The "candidate list" will be updated and published periodically by ECHA as more substances are identified as SVHC.

IC Intracom's products are not intentionally manufactured or formulated with compounds and substances above the 0.1% threshold by weight listed in the REACH document titled "Candidate List of Substances of Very High Concern for Authorization" dated June 25, 2020.

More specifically, the articles we produce are in full compliance with the related requirements of European Union Regulation (EU) 1907/2006, which concerns the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH):

- Description of Articles: With the exception of REACH-compliant cleaning products for electronics, IC INTRACOM does not manufacture substances or substance preparations for use in other products. Additionally, we do not anticipate registration, pre-registration or authorization changes for the products we supply.
- Article 33 of REACH — Duty to Communicate Information on Substances in Articles: We declare that our products contain neither the restricted substances identified by the REACH Directive nor quantities or concentration of SVHCs (Substances of Very High Concern) equal to or above 0.1% in composition.

The determination is based on information from sources which we believe are reliable.
